KLOSTERET I LANDSKABET

Gå en tur rundt i landskabet omkring klosteret og oplev historien. Turen er ca. 1 km. Se, hvor mægtigt klosterkomplekset lå i landskabet, og kig under jorden til de skjulte fortællinger om munkenes liv i de nu nedrevne bygninger.

● KLOSTERMODEL

Foran Klostergården finder du en model af klosterkomplekset, som det så ud i middelalderen. Den eksisterende bygning er massiv modsat de bygninger, som ikke længere findes. Prøv at lytte, måske ringer kirkeklokkerne.

● KLOSTERET I LANDSKABET

Ved hjælp af stregtegninger på glasplader kan du forestille dig, hvordan klosterkomplekset så ud i middelalderen fra tre forskellige vinkler. Prøv at forestille dig livet i og omkring bygningerne.

● SPOR UNDER JORDEN

Kig ned i pælene og se hvilke ting, som kunne være blevet fundet på netop dette sted i klosterkomplekset. Prøv at gætte, hvad det er, og hvorfor det ligger netop her, før du læser teksten.

● VANDMØLLE

Oplev en fortolkning af en vandmølle på netop det sted, hvor i hvert fald én af klostertidens vandmøller stod. Se, hvad der sker, når du går forbi installationen.

THE ABBEY IN THE LANDSCAPE

Go for a walk in the landscape surrounding the abbey and learn its history. This route is about one kilometre long. Witness how grand the abbey sat in this landscape, and look underground for the hidden tales about the lives of the monks, in the now torn down buildings.

● A MODEL OF THE ABBEY

In front of the abbey's courtyard, you will find a model of the abbey complex, as it was in the middle ages. The existing structure is the complete opposite to the buildings, which are no longer standing. Try listen and maybe you'll hear the church bells ring.

● THE ABBEY IN THE LANDSCAPE

With the help of line drawings on glass plates, you'll be able to imagine what the abbey complex looked like in the medieval age, from three different angles. Just imagine what life was like in and around these buildings.

● CLUES BELOW GROUND

Look down into the posts and see what could have been found in exactly this spot in the abbey complex. Try and guess what it is and why it is found right here, before you read the accompanying text.

● THE WATER MILL

Experience an interpretation of a water mill in exactly the spot, where at least one of the water mills stood in the grand times of the abbey. Also, see what happens, when you walk past this installation.
